Brand New Book ***** Print on Demand *****.Excerpt from **Cyclopedia of Textile Work: A General Reference Library on Cotton, Woollen and Worsted Yarn Manufacture, Weaving, Designing, Chemistry and Dyeing, Finishing, Knitting, and Allied Subjects** The Textile Industry has shared to such an extent the modern tendency toward specialization, and has been marked by the development of such a multiplicity of types of machinery and special mechanical and chemical processes, that the various branches of this great industry to-day constitute in reality distinct though closely related arts. The present volume is intended to supply a practical working guide to all details of the most approved modern methods and machinery used in Finishing Woollen and Worsted Goods in general, and of the processes involved in the special treatment of all types of standard fabrics. Special stress is laid on the practical as distinguished from the merely theoretical or descriptive form of treatment of each topic, the work being based on a careful study of conditions and needs as developed in the best American mills. This volume will be found especially adapted for purposes of self-instruction and home study, fitted not only to meet the requirements of a manual of instruction for the beginner in textile art, but also to serve as a reference work replete with information and suggestions of the utmost practical value to the most advanced and experienced textile worker.
